Features: 1 YEAR WARRANTY

A Good Beginners starter pack. A lightweight portable Digital Cosmetic Tattoo Machine accommodates both Round Flat and Slope Needles.

This machine is suitable for the beginner has 5 speeds suitable for basic cosmetic tattoo

This machine has just the one disposable capsule which must be changed for every client.

Needles: Precision engineered needles are available from single prong through to five round prong round needles four prong flat needles and ten curved needle.

Caps: The Machine Caps allow for pigment to be inserted into the cap thus cutting out the need to dip into pigment holders!

A regulated airflow allows for the correct amount of colour to be used for every treatment. Not enough air causes a “vacuum effect” and sucks up pigment; too much air can force pigment down too hard and splatter this stops pigment being taken into the skin. Less pigment in the skin will cause the colour to fade.

MACHINE KIT OPTION 2 - \$2,800

NOUVEAU INTELLIGENT MEDICAL MACHINE"
FEATURES: 3 YEAR WARRANTY ON MACHINE &
HANDPIECE

The world's first computerized device used for medical procedures and permanent cosmetics.

The Intelligent machine is equipped and controlled by an Intel Microprocessor Chip and was designed to assist the practitioner in distinguishing between the varying areas of application, i.e. eyes, lips, eyebrows, and medical.

The software installed in the central processing unit (operating system) consistently calculates the best needle frequency (speed) needed to achieve optimal pigment retention. Skin structure varies according to the location. Structure and tolerance of the skin is different for each area of application.

Select a procedure either brow, eye, lip or medical by pressing a button and the computer brain chooses the precise setting for you. The Intelligent can also be adjusted to your requirements.

Takes slope, round, flat, magnum and power needles.

This heavy duty power machine comes with a 3 year warranty.

Intelligent Contoured Hand Piece-comfort, precision and safety.

The hand piece is light weight, vibration free and it's ergonomic design eliminates over heating.

High end features means easy to use.

Unique easy turn adjustable ring allows you to accurately adjust needle depth from the hand piece.

The hand device can be used either with the Intelligent and Digital machines.

This hand device comes with a 2 year warranty.

Only Nouveau Contour hand pieces offer this feature
